I want to become a professional in Backend programming. I am interested in this area. I'm ready for non-standard tasks. I like parsing, analyzing statistics, emulating situations, **understanding how products work**, and **I want to take responsibility for products and commands**.

SKILLS

- application of programming patterns
- ability to adjust the test environment, TDD
- practice of reverse engineering
- practice of writing high-performance code
- practice of writing clean code
- more and quick read documentations
- I want to understand business
- providing a full development cycle
- desire to develop into backend development and take on more responsibility
- initiative, independence
- master everything necessary in a short time

TECHNOLOGIES

Python

Django

Flask

Celery

JavaScript

React

NodeJS

C++

Win32API

ZMQ

Linux

Docker

Kubernetes

GitLab

Jenkins

Bitbucket

OpenCV

Sklearn

EXPERIENCE

PYTHON SOFTWARE ENGINEER, Rambler Afisha

November 20 – now

Created a pipeline for building iOS and Android applications and running tests with generating reports on the server. Rewrote unit tests and covered UI on 50% by coverage tools. There is no similar experience in teams.

PYTHON SOFTWARE ENGINEER, SBERBANK (SBERUSER)

January 20 – March 20

Built automation, set up a test environment, conducted unit, load, stress, performance, bulk and functional testing, tested api and security. Used tools like Python, Django (pytest, unittest), JavaScript, Kubernetes, Docker, Selenium, Behave, Appium, Emulators, Jenkins, BitBucket, Allure, Wireshark.

PYTHON AUTOMATION, SBERBANK (SBERCLOUD)

November 19 – January 20

Built test benches, unit tests, functional, implement automation. Used tools like Python (pytest, unittest), JavaScript, Selenium, Grafana, Docker, self-written framework, Wireshark, Emulators, Jenkins, Jira, Confluence, Jenkins, Git.

DATA ENGINEER, SBERBANK (TERADATA)

March 19 – May 19

Complex SQL queries, parsing sites (OSINT). Data collection, cleaning and analysis. Studying database devices using example MYSQL, PostgreSQL. Used tools like Python, Selenium, Jira, DBeaver, various visualization tools.

PROJECTS, HACKATHONS, CHAMPIONSHIPS, OPEN SOURCE

2018 – now

Full development cycle. Used tools like C++, OpenCV, Threads, Python, AsyncIO, Django, JavaScript, React, Docker, Matplotlib, Plotly, Keras, TensorFlow, Flask, Node.js, Win32api and so on...

EDUCATION

APPLIED MATHEMATICS AND INFORMATICS - **NATIONAL RESEARCH NUCLEAR UNIVERSITY MEPHI and MAI**

ENGLISH B2 GERMAN B1

I am open for retraining, DIY - development, I offer you my experience in exchange for great product ideas and lofty team goals.
